

Information Security Policy CODESREEN BRAINCUB INCUBATOR LTD utilises some of the most advanced technology for Internet security available today.

When you access our site using a supported browser such as Google Chrome, Firefox, Internet Explorer, or Safari Secure Socket Layer (SSL) technology protects your information using both server authentication and data encryption, ensuring that your data is safe, secure, and available only to authorized users. Your data will be completely inaccessible to anyone else.

CODESREEN BRAINCUB INCUBATOR LTD provides each user in your organization with a unique user name and password that must be entered to access your workspace or network. CODESREEN BRAINCUB INCUBATOR LTD does not use "cookies" to store other confidential user and session information, but instead implements more advanced security methods based on dynamic data and encoded session IDs. World-class "defense-in-depth" security is included in every business workspace from CODESREEN BRAINCUB INCUBATOR LTD, including physical security, encryption, user authentication, and application security: Physical Security

- 24/7 guarded facility with video monitoring
- Video monitoring of facility
- Physical access is limited to a subset of trusted employees and requires photo ID
- Dedicated servers
- Redundant power connections with UPS and generator backup
- Multiple redundant network connections

Network Security

- Industry leading firewall
- intrusion detection systems
- Encryption is used for all traffic on paid products (except Public Edition) and across the organisation administrative network
- IP whitelisting and blacklisting to provide additional control over who can access your data

Policies and Procedures

- 24/7 monitoring and escalation
- All users are verified by email before they can begin using services of this company
- By policy employees are prohibited from accessing private data
- All employees go through a detailed background check before starting work
- Our organisation claims no ownership of your data
